

SPANISH IMPORT DELAYS

We are currently experiencing substantial delays in goods Northbound from Spain to GB. Despite all the pre-Brexit preparations on our side it seems that European hauliers and operators are not quite up to speed. To custom clear your goods we must ensure that all paperwork is in order and can be issued in the correct way to allow for goods to travel uninterrupted.

We have goods currently being held in terminals throughout Spain where the operators have not been able to produce the correct certificates since the 1st of January 2021 causing a backlog of cargo. We have now updated all ETA's on the portal, and we hope that this congestion will begin easing up in the coming week.

Many thanks for your understanding and patience.
